

## Industry's First High-Voltage Digital Potentiometer with Internal Temperature Compensation

### High-Voltage Operation Reduces Component Requirements

The DS3501 provides temperature compensation to a high-voltage, 128-step digital potentiometer to eliminate temperature variability from industrial calibration and control applications.

**INDUSTRIAL CONTROL  
AND CALIBRATION**

- Analog Bias Voltage Input for Wide Terminal-Voltage Operation from 4.5V to 15.5V
- 128 Wiper Steps (or 7-Bit Resolution)
- 10k $\Omega$  Full-Scale Resistances
- Temperature Adjustments at Approximately 3.9°C Increments

- 36-Word EEPROM Lookup Table
- On-Chip Temperature Sensor and ADC
- I<sup>2</sup>C-Compatible Serial Interface
- -40°C to +100°C Operating Temperature
- Small, 10-Pin  $\mu$ SOP

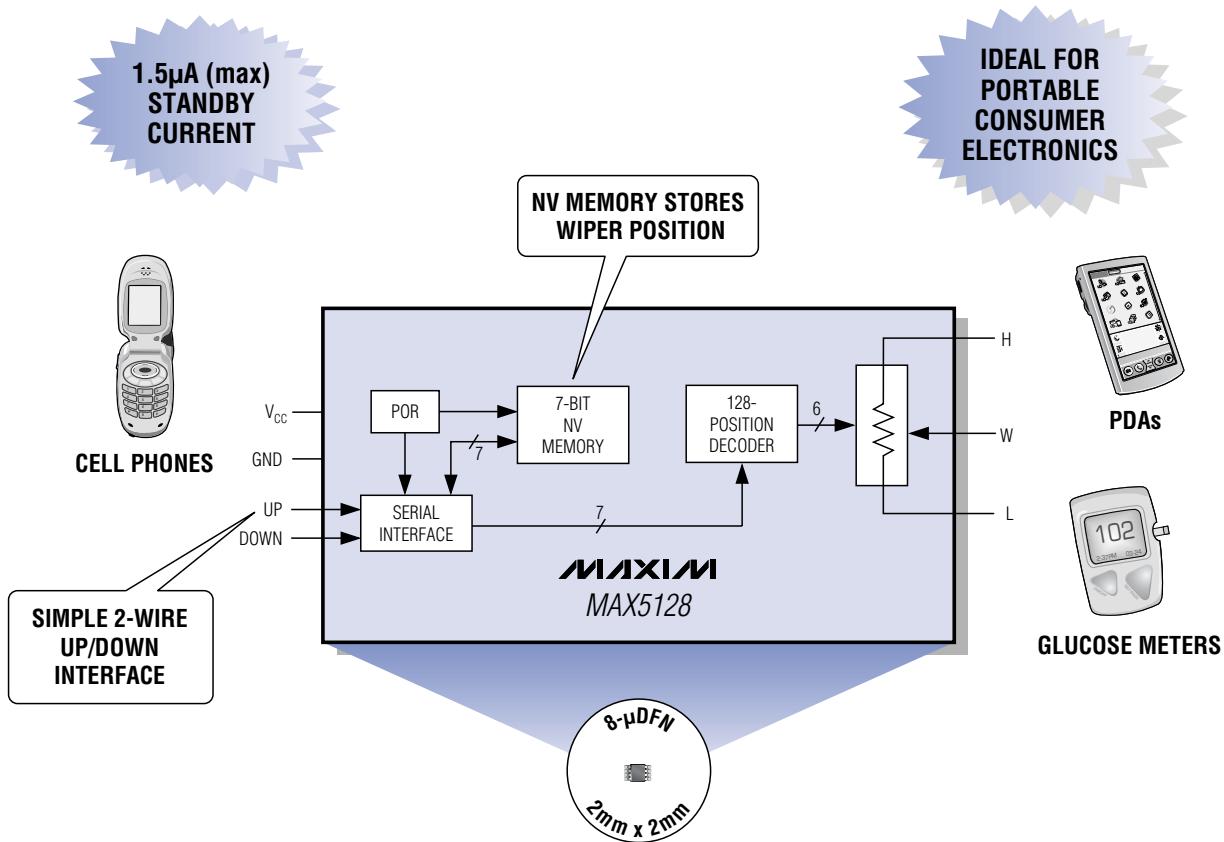

#### In This Issue

- Optical-Control Products

- Audio-Control Solutions
- High-Resolution Adjustment

# Smallest 128-Tap, Nonvolatile Up/Down Digital Potentiometer

With an ultra-small, 2mm x 2mm µDFN package, 1.5µA (max) standby supply current, and simple 2-wire up/down interface, the MAX5128 nonvolatile (NV) digital pot is ideal for use in portable consumer electronics. This device has 22kΩ end-to-end resistance and a 5ppm/°C ratiometric temperature coefficient.

- Tiny, 2mm x 2mm µDFN Package
- Wiper Position Stored in NV Memory and Recalled at Power-Up
- 22kΩ End-to-End Resistance
- 128 Tap Positions
- -40°C to +85°C Temperature Range
- 5ppm/°C Ratiometric Temperature Coefficient
- 1.5µA (max) Standby Supply Current
- 2.7V to 5.25V Single-Supply Operation
- Pricing Starts at \$0.68<sup>†</sup>

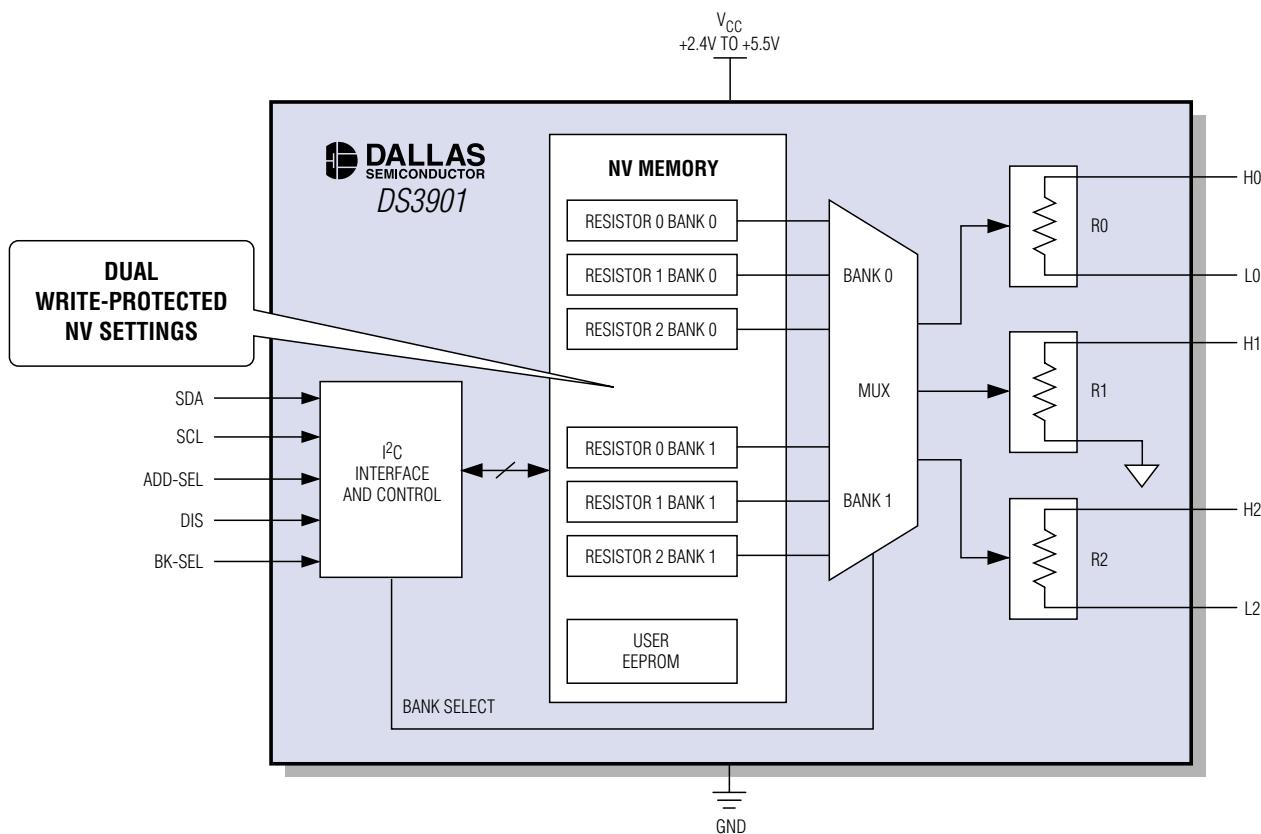

For More Information on Maxim's Complete Line of Digital Pots,  
Go to: [www.maxim-ic.com/DigiPots](http://www.maxim-ic.com/DigiPots)

†1000-up recommended resale. Prices provided are for design guidance and are FOB USA. International prices will differ due to local duties, taxes, and exchange rates. Not all packages are offered in 1k increments, and some may require minimum order quantities.

# >NEW Industry's First Variable Resistor with Dual NV Settings

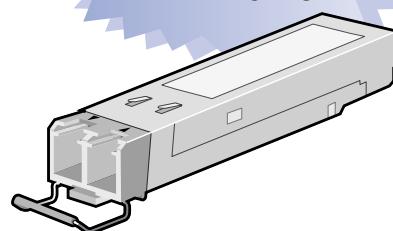

## Enables Two Calibration Settings for Each Resistor

The DS3901 triple 8-bit, NV variable resistor is unique because each of its variable resistors can be programmed to two different NV settings. Toggling between the two values is then accomplished by software through the I<sup>2</sup>C interface or an input pin. This device is ideal for applications requiring two different factory calibrations for each variable resistor.

- Three 256-Position Linear Digital Resistors
  - 50kΩ, 30kΩ, and 20kΩ Full-Scale Resistances
  - Low 50ppm/°C, End-to-End Temperature Coefficient
- Dual NV Settings for Each Resistor
- Two-Level Password Write Protection
- 232 Bytes of User EEPROM
- I<sup>2</sup>C Serial Interface with Programmable Slave Address
- 14-Pin TSSOP

DUAL RESISTOR SETTINGS ENABLE DUAL OPERATING MODES FOR END APPLICATION

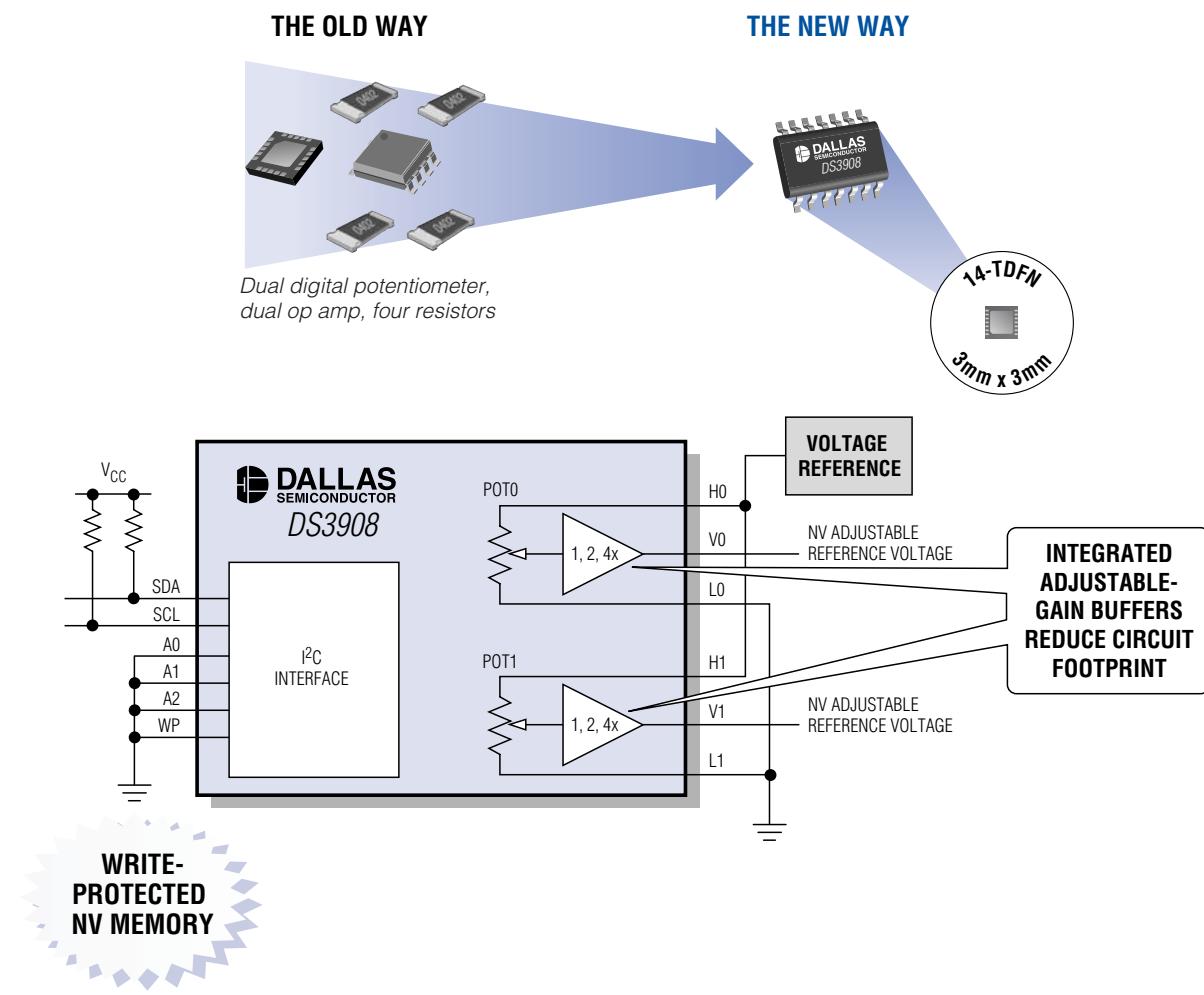

100Mbps/1Gbps Ethernet optical transceiver module requires that various transmit and receive parameters be calibrated differently for each mode of operation.

# Dual Digital Potentiometer with Buffered Wipers Improves Output Linearity and Reduces Circuit Area

## Eliminates External Op Amps

The DS3908 contains two 64-position NV digital pots with programmable-gain amplifiers that buffer the wiper outputs. The buffered wipers offer distinct advantages over standard digital pots by providing a high-impedance load for the pot and a low-impedance voltage output. This improves the linearity of the output voltage by eliminating changes in current through both the potentiometer and the wiper impedance.

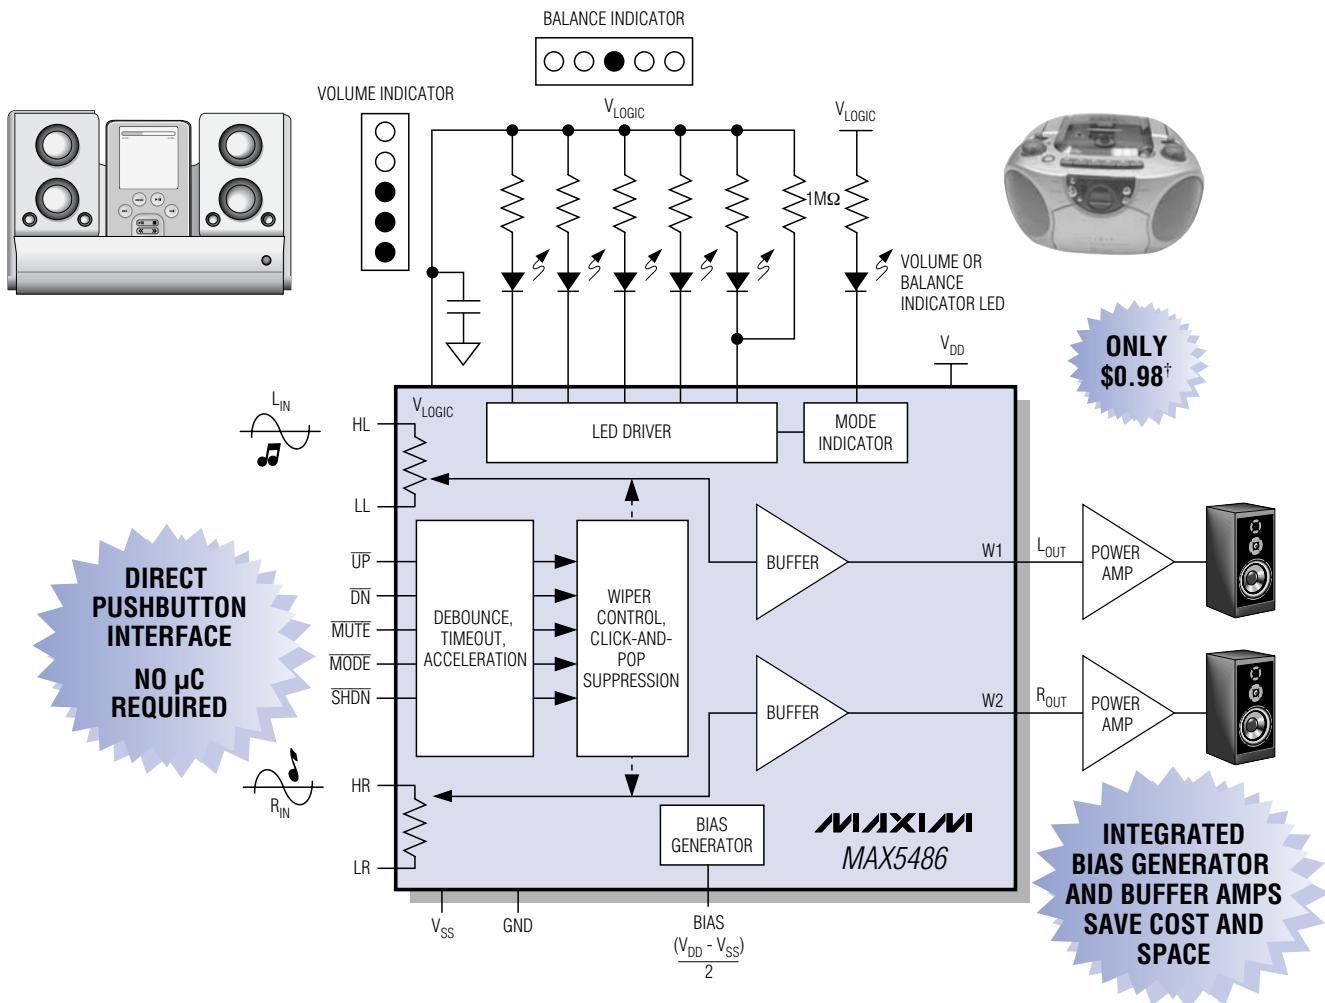

- Two NV, 64-Tap, Linear Taper Potentiometers
- Integrated Wiper-Buffering Amplifiers with Selectable Gains of 1, 2, or 4
- 100kΩ End-to-End Resistance
- Low 10ppm/°C Ratiometric Temperature Coefficient
- Up to Eight Devices on a Single I<sup>2</sup>C Bus
- +3V to +5.5V Supply Voltage Range
- 3mm x 3mm, 14-Pin TDFN Package

# >NEW Pushbutton Stereo Volume and Balance Controller Has 5-Segment LED Driver

## Integration Saves Space, No $\mu$ C Needed

The MAX5486 volume and balance controller features Maxim's proprietary enhanced SmartWiper<sup>TM</sup> architecture. SmartWiper eliminates the need for a  $\mu$ C by automatically advancing the wiper at a rate of 4Hz for presses between 250ms and 500ms, at a rate of 8Hz for presses between 500ms and 1s, and at a rate of 11Hz for presses > 1s.

- Debounced Pushbutton Interface Directly Controls Volume and Balance
- Integrated Low-Power Wiper Buffers Provide 0.003% THD+N
- SmartWiper Control with Accelerated Auto-Advance
- Clickless Switching

- Integrated Bias Generator
- 5-Segment LED Indicator Driver Provides Volume or Balance Level
- 32-Tap Log Taper with 2dB Step Size
- Power-On Reset to -12dBFS Wiper Position
- -90dB Mute

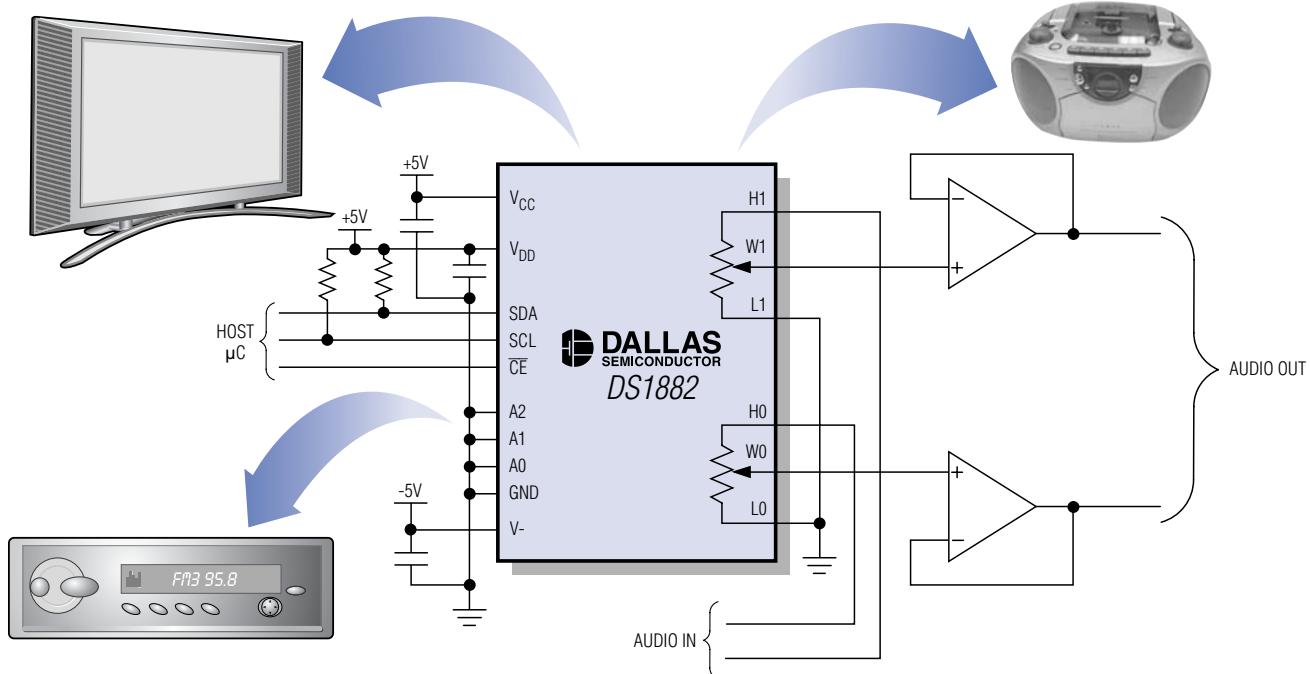

SmartWiper is a trademark of Maxim Integrated Products, Inc.

<sup>†</sup>1000-up recommended resale. Prices provided are for design guidance and are FOB USA. International prices will differ due to local duties, taxes, and exchange rates. Not all packages are offered in 1k increments, and some may require minimum order quantities.

# Dual NV Audio Potentiometers Provide Low-Noise, Low-Distortion Digital Volume Control

Available in Single (+5V) and Dual ( $\pm 7V$ ) Supply Versions

- Two User-Configurable Attenuation Options
  - 63 Positions + Mute (> 90dB) (1dB/Step from 0 to -62dB)
  - 32 Positions + Mute (> 90dB) (1dB/Step for 12 Steps, 2dB/Step for 12 Steps, and 3dB/Step for 8 Steps)
- Dual Audio Taper Potentiometers
- Low THD+N (0.005%, typ) and Crosstalk (110dB, typ)
- NV Wiper Storage Option

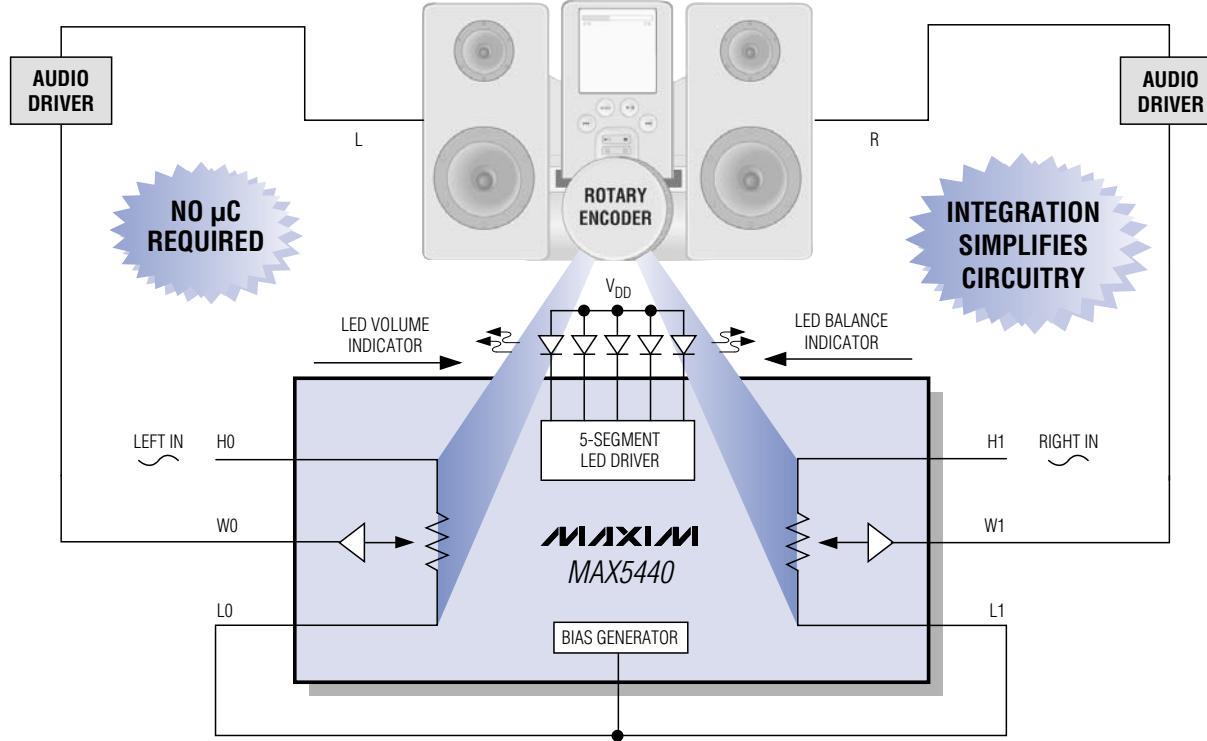

- Zero-Crossing Detector Eliminates Switching Noise
- I<sup>2</sup>C-Compatible Serial Interface
- Three Address Pins Allow Up to Eight Devices on I<sup>2</sup>C Bus
- 45kΩ Potentiometer End-to-End Resistance
- Available in Lead-Free Packages
- Pin Compatible with the DS1808
- Single +5V (DS1881) or Dual  $\pm 7V$  (DS1882) Supply Versions

Part	Analog Supply Range (V)	Temp Range (°C)	Package	Price <sup>†</sup> (\$)
DS1881E-050+	0 to +5	-40 to +85	16-TSSOP	0.95
DS1881Z-050+	0 to +5		16-SO	0.95
DS1882E-050+	-7 to +7		16-TSSOP	1.16
DS1882Z-050+	-7 to +7		16-SO	1.16

<sup>†</sup>1000-up recommended resale. Prices provided are for design guidance and are FOB USA. International prices will differ due to local duties, taxes, and exchange rates. Not all packages are offered in 1k increments, and some may require minimum order quantities.

# Rotary-Encoder IC Controls Volume and Balance Without μC

Integrated Bias Generator and Buffered Outputs Save Op Amps

Ideal for Stereo Desktop Speakers, Docking Stations, Set-Top Boxes, and Other Consumer Audio Products

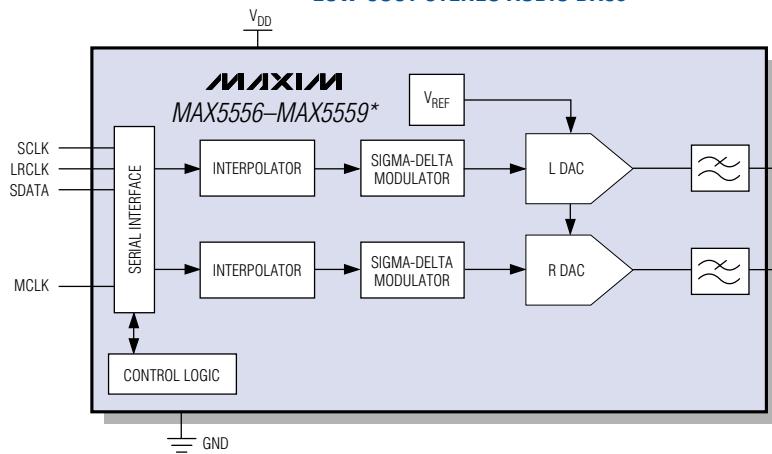

- Debounced Rotary-Encoder Interface Directly Controls Volume and Balance
- Integrated Low-Power Wiper Buffers Provide < 0.003% THD
- Clickless Switching
- 5-Segment LED Setting Indicator Shows Volume or Balance Level
- 32-Tap Audio Taper
- -90dB Mute
- -12dB Power-On Reset

# Highly Integrated

Premium Products for Set-Top Boxes, LCD Monitors/TVs, Automotive

## LOW-COST STEREO AUDIO DACs

**MAX5556–MAX5559\*** Are Direct Upgrades  
to CS4334/5/8/9

- Line-Level Outputs Swing 3.5V<sub>P.P</sub> (typ) with 10kΩ Load
- THD+N > -87dBc, 87dB Dynamic Range
- Sigma-Delta Stereo DACs with Built-In Interpolation and Analog Output Filters
- Output Muted During Loss of Clock; Glitch-Free Return to Normal Operation When Clock Is Restored
- Click-/Pop-Free Power-Up and Power-Down
- Operation with f<sub>S</sub> = 2kHz to 48kHz from an MCLK Up to 25MHz
- Automatic Detection of Clock Divisor (MCLK/LRCLK)

CLICK-/  
POP-FREE  
GLITCHLESS  
OPERATION

IDEAL FOR AUTOMOTIVE  
MULTIMEDIA AND  
SET-TOP BOXES

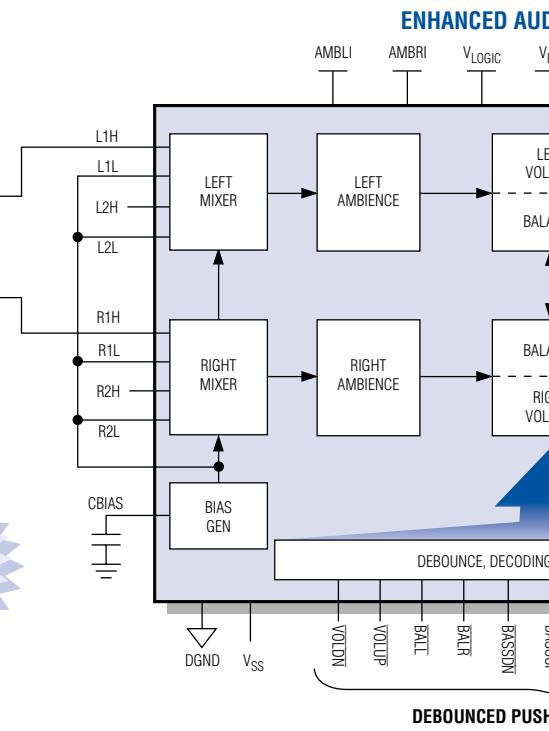

## Multiple Interface DACs

Part	Interface	Temp Range (°C)	Package	Price <sup>†</sup> (\$)
MAX5556	16-bit to 24-bit I <sup>2</sup> S	-40 to +85	8-SO	0.99

<sup>†</sup>Prices provided are for design guidance and are for the lowest grade commercial temperature parts (FOB USA). International prices will differ due to local duties, taxes, and exchange rates. Prices are subject to change. Not all packages are offered in 1k piece increments, and some may require minimum order quantities.

## Digital Potentiometers (continued)

Part	Smallest Available Package	No. of Tap Positions	No. of Pots in Package	Resistor Taper	Supply Voltage (V)	End-to-End Resistor Values (kΩ)	Digital Interface	NV	Price 1000-up† (\$)
<b>TRIPLE</b>									
DS1846	20-TSSOP	100/256	3	Linear	2.7 to 5.5	2×10, 100	2-wire	✓	2.43
DS3903	20-TSSOP	128	3	Linear	2.7 to 5.5	2×10, 90	2-wire	✓	0.95
DS3904/5	8-µSOP/10-µSOP	128	3	Linear	2.7 to 5.5	20	2-wire	✓	0.70/0.75
DS3906	10-µSOP	128	3	Pseudo-log	2.7 to 5.5	2×2.5, 1.4	2-wire	✓	1.27
DS3901	14-TSSOP	256	3	Linear	2.4 to 5.5	20, 30, 50	I <sup>2</sup> C	✓	0.88
<b>QUAD</b>									
DS1844	20-TSSOP	64	4	Linear	2.7 to 5.5	10, 50, 100	2-wire	Ideal for applications requiring multiple controls	
<b>SEXTET</b>									
DS1806	20-TSSOP	64	6	Linear	2.7 to 5.5	10, 50, 100	3-wire	Daisy-chain capability	
<b>SPECIALTY DIGITAL POTENTIOMETERS</b>									
DS1847/8	4×4 BGA	256	2	Linear	3.0 to 5.5	10, 50	2-wire	✓	2.16/2.37
DS1851	4×4 BGA	256	2	Linear	3.0 to 5.5	—	—	✓	Ideal for optical transceivers; includes temp sensor, NV lookup table, variable resistors, and user EEPROM (DS1848 only)
DS1854	4×4 BGA	256	2	Linear	3.0 to 5.5	50	2-wire	✓	
DS1856	4×4 BGA	256	2	Linear	2.8 to 5.5	50/50	2-wire	✓	Ideal for optical transceivers; includes temp sensor, NV lookup table, and 8-bit DAC
DS1857/8	4×4 BGA	256	2	Linear	3.0 to 5.5	50	2-wire	✓	
DS1859	4×4 BGA	256	2	Linear	2.85 to 5.5	2×50 or 2×20	I <sup>2</sup> C	✓	Temp-controlled resistors, ADC, 256-byte EEPROM
DS1870	16-TSSOP	256	2	Linear	4.5 to 5.5	13	I <sup>2</sup> C	✓	
MAX5420	8-µMAX	4	1	—	2.7 to 5.5	15	2-wire parallel	✓	Temp-controlled resistors, ADC, 256-byte EEPROM
MAX5421	10-µMAX	4	1	—	2.7 to 5.5	15	2-wire parallel	✓	
MAX5430	8-SOT23	4	1	—	±12 to ±15	57	2-wire parallel	✓	Temp-controlled resistors, ADC, 256-byte EEPROM
MAX5431	10-µMAX	4	1	—	±12 to ±15	57	2-wire parallel	✓	
MAX5426	14-TSSOP	4	1	—	±5 to ±15	—	2-wire parallel	✓	Temp-controlled resistors, ADC, 256-byte EEPROM
MAX5490	5-SOT23	1	1	—	—	10	—	✓	
MAX5491/2	3-SOT23	1	1	—	—	30/(10, 100)	—	✓	0.67
DS4303	5-SOT23	—	—	—	2.4 to 3.6	—	—	✓	0.67
DS4305	5-SOT23	—	—	—	4.0 to 5.5	—	—	✓	0.39
									0.39
